Revenue	€1,805,804	€1,694,637	7%

The Group registered a turnover of €1,805,804 (2013: €1,694,637) over the six months ended 31 December 2014. A loss before tax of €117,556 (2013: Loss before tax of €135,207) was reported by the Group. The Group registered another marked improvement of 44% in EBITDA. Tight cost control and success in new revenue sources have improved profit to revenue ratios across all business units. This also translated in an increase in net cash-flow from operating activities which allowed the Group to increase investment in research and development, since this will ultimately give the required cutting-edge in the business. The period July to December 2014 was another period of progress in the Group's journey to deliver sustainable growth, with a further decrease in loss for the period of 13%.

The Group has placed all its sellable fleet management related assets and business into a new subsidiary called Loqus Fleet Limited. Loqus Fleet successfully launched a number of new projects and as importantly the renewal and further development of existing customers. Artoni in Italy renewed their contract with Loqus and moved to our new HTML5 based dispatching platform and the Loqus Fleet further enhanced on the tracking system for the municipal police of Rome. Geopost/DPD, one of the most important delivery companies in the UK, have continued to grow their engagement with us with a number of new initiatives as we constantly expand our flagship route, network & organisational optimisation tools. The Group has also recently been awarded a tender for the procurement and installation of traceability equipment for the Department of Fisheries and Aquaculture which continues to consolidate our dominance in the local market when it comes to Vessel Monitoring Systems for the public sector. Apart from Fisheries, the Group has major systems at the Government Property Division, Transport Malta, Malta Industrial Parks, Land Registry, Department of Local

Government & Malta Information Technology Agency (MITA), all through our newly acquired Loqus Public Sector.

Although an improvement in our cash generation from operations has been reported, cash flow will continue to be a challenge. Even though Loqus has encountered an extremely difficult period in terms of cash flow, the Group has, by August 2014, repaid in full all bank facilities. This was done by ensuring that all relevant loans and excess facilities were repaid on time despite the poor cash flow position.

Way forward

Our aim is to clarify the performance of our Fleet Management business which will in turn allow the Group to attract and retain strategic investors and personnel. Our ability to compete internationally depends on our ability to improving our products faster than our competitors, anticipating industry requirements, developing and launching new products and platforms while pricing our products competitively by constantly reducing setup and monthly costs. Our agenda for the next two years is to merge our products into a continuous range of Fleet Management products covering Tracking, Driver Behaviour, Mobile Workforce Management, Field Service Management, Scheduling, Dispatch and Optimisation. These products will be cloud based and on open web systems to provide the lowest cost, high quality solutions that we are capable of providing.

Overall, the financial period under review shows another marked improvement over the prior year. We hope that the Group's financial situation will soon start to reflect more tangibly our confidence in our products and services.
